REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The prior art of record fails to teach a breathing aid apparatus comprising, among other features, means for controlling expiration including an expiration valve; means for detecting pressure operatively connected to the inspiratory branch; means for ventilating including means for controlling the inspiration valve and the expiration valve (valve controller), wherein the inspiration valve is closed during expiration and the expiration valve is closed during inspiration, the means for ventilating further including pressure control means for comparing a pressure signal from the means for detecting pressure and for adjusting the pressure of the means for supplying. Applicant's arguments with regards to the combination of the non-patent literature, Siemens Servo Ventilator 300, and the Baum reference in the amendment filed on 08/02/04 is found persuasive. The addition of the Baum reference could not be integrated with the non-patent literature without destroying the reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
